An "August" Determination.

As previously announced, we propose to do more business this August than during any provious August, and to accomplish this we shall prescribe for the public such marvellously good values as will undoubtedly swell our sales to an unprecedented amount for this son-

son of the year. The advancement of the season necessitates our marking down many lines of our most desirable Summer Fabrics, in order to more quickly cause their removal.

Economber the Price is of little ob-Ject to us when the goods must be sold.

25c French Lawns at 12 1-2c.

If we could foresee what kind of goods and what kind of patterns, whether large or small, were going to be worn each season, our fortune would be made, but as it is, there is no telling, and this fact alone puts some half-value, for instance:

French Linen Lawns at the French Linen Lawns at the beginning of the season looked lovely, and at 25c we library of the season looked lovely, and at 25c we library of this effy; W. W. Civil-Service at New York,-It is intimated at the headquarters of the Civil Service Commission that efforts are being made to secure a harmonious settlement of the civil-service controversies at New York, and to gain the co-operation of the col-lector and surveyor. In the meantime no action will be taken.

The Bibbs' Extradition.—There has been eccived at the Postoffice Department a copy f the decision rendered by Judge Crea before whom the extradition proceedings were held in the case of Hibbs, the default-ing leahe pastmaster. Judge Crease held that Hibbs offense was one of forgery, and therefore clearly extraditable.

New York Civil-Service Trouble. Civil-Service Commissioner Eaton and Chief Examiner Lyman are on their way to New York to repeat the requests to the Collector and Surveyor, for them to nominate candidates for the five vacancies on the New York Civil-Service Board. If the officials persist in their refusal, the Commission will make appointments at once.

A Silver Purchase.—The Treasury Department yesterday purchased 200,000 ounces of silver for delivery at the Philadelphia Mint for coinage into standard dollars. It is learned at the Department that there is now quite a brish movement of silver dollars all over the country. The issue averages about \$100.000 a week more than during the same period of last year, and is slightly in excess of the regular monthly coinage of \$1,000,000.

It seems Owen is a Cherokee, and it is claimed by is ineligible from this fact. The matter will be taid lea-fere President Cleveland for final action,

Paying Exposition Claims,—Warrants have already been issued by the Treasury Department for the payment of undisputed claims regainst the World's Exposition at New Orleans, amounting to \$188,023. There remains only about \$61,080 to be puld on account of claims, the justice of which is adcount of claims, the justice of which is ad-mitted by the managers of the exposition. Saratoga correspondent spins a yarn to this effect: "I see that there has been a good deal of guessing as to the judgeship indi-cated in President Cleveland's recently published letter of rebuke. Now, I think I can make a better guess than anything I have yet seen published. I believe the hero of this correspondence is High J. Brinker of Warrensburg, Mo. He was appointed to some idaho judgeship through the influence of Senator Cockrell. Cockrell had Brinker appointed simply to get him out of the way."

JUST STRICTURES BY "BIV."

The shooting match to-day has been proveentive of much fan. The range occupied one of the long, salt meadows back of the city, the home of the Jersey mounts. Every backs of grass was the lair of a degen of these pests, and when the party marched through to the range the ale was thick with them. When the firing began it was amusing to see a stailwart minuteyman take careful aim and fix for a built-sey. Just then a "muskout" would get in his work on his nose and with a concubry lock he would pull the trigger and make a "mag." The stone, brick and brea-work have at ready been completed to within one story of the roof. It is the purpose of Colone Casey to have these wings under roof by the time scrore weather commences, so as to enable the interior work to be continued all winter. The necessity for completing the building at as certy a data as possible becomes more and more apparent as the completed pertions are now overcrowded. The western and contral wings, connecting the eastern, northern and southern wings, will consplete the building, and, to external ap-

The hop at Coupress Hall last night was the most brilliant affair that has occurred here for years. The ball-room doors were

athing, and between the hours of II and I o'clock each day the beach is Biterally swarming with people. Everybody bathes; the tall, the short, the lean, the fat, the old and the young. Even the dudes like it, and

nd fatal accidents are rare, yet occasionally ome idiot will persist in overestimating his skill and strength, and then there rings along the sand the thrilling ery, "A man drown-ing," There is a wild rush for the shore on the part of ladies and children, and then the brown, sun-tanned arms of a half-dozen strong swimmers are seen cleaving the water as they hasten to the add of the imwater as they haster to the aid of the im-perilled man. They reach him and support his head above the waves; but how are they to get him astore; "Form a line!" yells somebody, and at once a score or two of men grasp hands and one end of the living rope moves out seeward and grasps the

But who are the people who have thus risked their own lives to save a fellow creature from drowning? Are they expert surfmen employed by the hotels and bathing-houses to look after the welfare of their patrons? Not much. They are simply visitors, here for pleasure, and paying tributs to hotels and bath-houses. They have taken the risk they can simply because in no other way could a life be saved. There is no life-hoat outside the line of breakers to resente a drowning man. No repe on the beach, not even a life-preserver to aid in keeping him affoat. Nowhere in the world is there displayed such superhalive meanness as a lore at Cape May in the failure of these who live by the crowds drawn here to enjoy sea-bathing. There is a disregard for the safety of visitors in this respect that should be met by the stern disapproval of public opinion. A single feat with a crew of five men would entail a cost of less than a lundred dollars per week—not \$5 each from the prominent hotels contiguous to that point on the beach where there is always a crowd of bathers, to say nothing of the score or more of cottages within the same limit. While landlords and proprietors of bath-houses quarrel and blesker over who shall supply the safeguards abso-But who are the people who have thus
